We Speak Quantum

About QURECA

QUIRECA (QUantum RESources & CAREers) is the leading company that offers professional services, business development, and the first online platform for training and resourcing in quantum technologies.

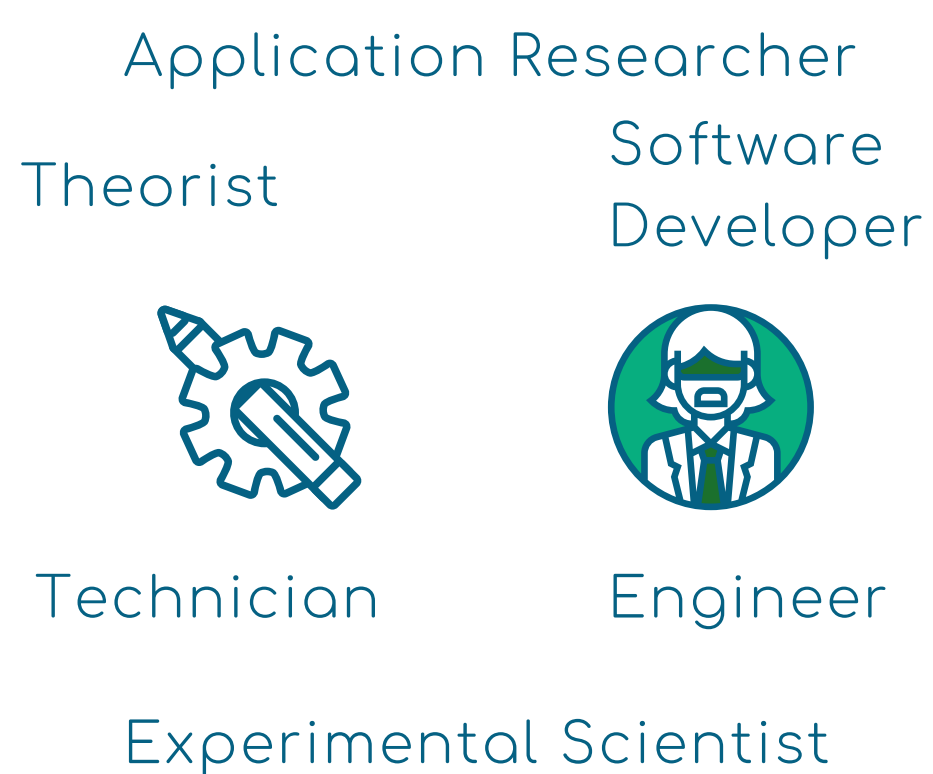

QUIRECA supports businesses to identify and hire the needed expertise by finding the best candidate pool and provides career coaching services to anyone looking for a new role in quantum technologies

How can we help?

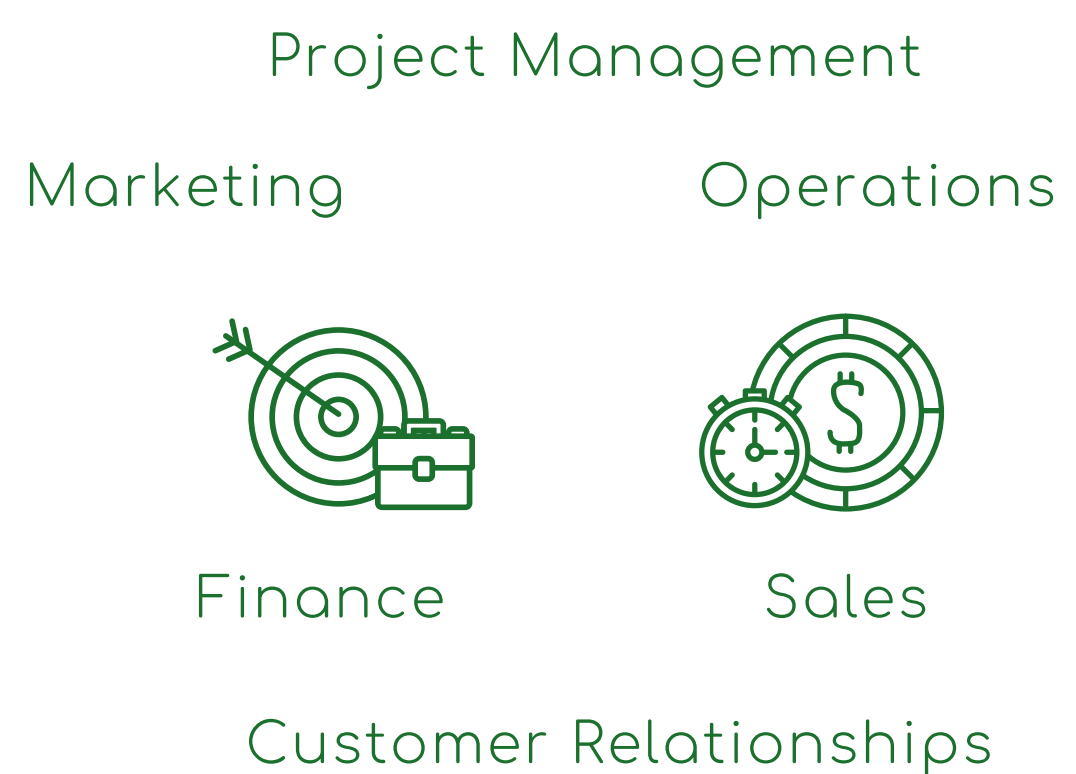

Arising from our expertise in both academia and industry, we know the way to integrate quantum technologies into your business, offering resourcing services that are tailored to your specific sector and your specific business requirements.

Technical Positions

Non Technical Positions

Whether you are hiring interns, contractors or permanent employees, we take care of the whole recruiting process - from shortlisting CVs to conducting interviews and selecting the ideal candidates in the current labour market ensuring they also fit your company culture.

QURECA Services

QURECA provides professional support to start-ups and businesses and helps them become leaders in the field of quantum technologies.

QURECA can help you to build your brand, identify market trends/opportunities to reach new customers, and advance the long-term vision of your business.

Key strategic decisions aligned to a defined business vision can be the differentiator between failure and success.

QURECA supports businesses to make informed decisions through market insights and build their strategy in the field of quantum technologies.

Identifying the right quantum skills during the recruitment process is extremely challenging.

We offer you the most personalised recruitment service in the quantum community.

Training

Online Courses

Together with our expert partners, we develop a wide range of quantum training programs.

Tailored Packages

Transform your business with our integrated approach to quantum technology training packages.

Webinars and Workshops

Our webinars and workshops include a broad range of topics presented by a cohort of global experts.
