

Your Quantum Educational Partner

We help you develop your quantum
training or educational strategy

Customized for academia and industry

Duration
from 1 hour to
18 weeks

Online and in person courses
Bootcamps
Hands-on Tools

Customised
Learning
Programmes

For everyone:
from governments
to the general public

Industries

To make industry staff or potential customers understand quantum technologies and how to develop a quantum strategy, we develop quantum courses together with you for upskilling and reskilling talent, as well as to engage customers.

Upskill and train your team and/or your customers

We customize training courses in 3 dimensions depending on the following characteristics of the workforce:

- Quantum expertise level
- Professions of the training audience
- Industry or business sector

Get diverse professionals quantum ready !

We develop different training modules to meet the training needs of diverse professionals who need to understand quantum technology from different levels and perspectives.

CxOs Business Leaders Engineers
Software Developers Marketing and Sales
Project/Product Managers
Business Analysts Other Professionals

Shape the future of the quantum workforce !

Build quantum capability for different business sectors !

The only way to become a quantum master is thanks to a step by step approach.

- Understand quantum.
- Understand quantum for the business.
- Start with a PoC and specific use cases.
- Define the strategy.
- Build your quantum team.
- Full implementation.

QURECA collaborates with extensive quantum technology companies, academia and pilot users to provide training courses required by different business sectors:

Financial Services HPC and software
Defence and Space ICT (Telecom, security)
Transportation and Logistics
Energy and Utilities Automotive
Chemical and Pharmaceuticals
ICT (Telecom, security) Others

Educational Institutions

To address the issue of scarcity of quantum talent and nurture your students' potential in this field.

Make learning Quantum easy and more accessible

QURECA helps you design your curriculum on quantum technologies and quantum computing, from the basics to advanced courses. We work at all educational levels! Furthermore, we develop industry-specific modules that enable you to offer training courses to your students preparing them for their future jobs in quantum!

Introductory Courses

We have developed both e-learning courses and customised in-person introductory courses which covers the whole range of quantum technologies and more!

- What is Quantum?
- The Quantum Ecosystem
- Basics of Quantum Technologies
- Quantum Technology Use Cases
- Quantum safe-security
- Quantum Machine Learning
- IP for scientists

Hands-on learning tools

We use hands-on learning tools to facilitate your students to grab deeply the concepts of quantum technology and quantum computing.

Qureka! Box: The most tangible and engaging educational tool for teaching and learning quantum computing !

Advanced Courses

We collaborate with experts from quantum technology companies and academia to develop advanced courses on quantum technology and computing.

We provide hands-on training on **SpinQ's** desktop quantum computers to K-12 and undergraduate students.

E-learning platform

Our e-learning platform on quantum technologies is the only online platform focussed on offering quantum education with an industry focus. We help you develop your own online courses!

Why QURECA

DEDICATED

QURECA has been dedicated to build the quantum workforce for quantum technology since its establishment in 2019, having one of the few online platforms devoted to offer quantum training courses.

RESOURCEFUL

QURECA has built a network and established collaborations with global stakeholders in quantum technology, including academia, companies, and governments.

INNOVATIVE

We are constantly innovating our methods used to deliver quantum education: from online courses to hands-on tools, a unique methodology with a creative customization.
